

Ultra-Web® Cartridge Filters Deliver Value That Keeps on Going and Going...

INDUSTRY: Metalworking - grinding & powder paint application

PROBLEM: High maintenance cost from having to change commodity filters too often.

SOLUTION: The Donaldson Torit Ultra-Web filters installed at Altas have maintained low pressure drop and high efficiency for 4 years!

Sheet metal fabricator Atlas Manufacturing, Minneapolis, MN, counts on Ultra-Web to keep its custom-configured Donaldson® Torit® ECB (Environmental Control Booth) dust collectors running without much upkeep. Installed in six 6-cartridge ECB modules used in grinding and powder paint applications, the 36 first-fit Ultra-Web® filters have been cleaning the air at Atlas without changeout for 4 years. And they're still going strong!

“Ultra-Web just works. It keeps dust on the surface of the media, with low pressure drop, and dust is easier to pulse off,” said John Peterson, Co-President of Atlas. “Our air is more efficiently cleaned with Ultra-Web.”

Even after 4 years of constant duty in the paint booth, Donaldson Torit Ultra-Web filters are still filtering effectively, providing clean air back into the plant at Altas.

For Atlas, Ultra-Web's long-term savings in maintenance and filter costs far outweigh any initial price difference compared with lower-priced commodity filters. “Once you get Ultra-Web, the value speaks for itself,” said Peterson.

For 45 years, Atlas has provided contract manufacturing for precision custom finished sheet metal. They serve OEMs in telecommunications, computers, electronic data racking and enclosures, industrial products, medical and commercial applications.
